

Tax Credits Under the Energy Bill

NC Incentives

Renewables and Efficiency

HOME STAR

If you asked yourself the question when?
The answer is RIGHT NOW!

Current and Pending Federal Tax Credits, as well as State Tax Credits, were created so that you can lower your overall cost of ownership. This is the time to consider doing energy improvements to your home, including your heating and cooling system.

Example: Geo Thermal Systems

- Federal Tax Credit: 30% of cost including installation*
- NC State Tax Credit: 35% of cost including installation up to \$8,400 that can be taken over 5 years*

*Your tax advisor is the best person to advise you if you are eligible for these credits.
